

BASE

- Made from various recycled materials
- Stack and pack easily and suites standard pallets
- Base suites most reboundable blade types available
- All reboundable delineator bases include injection moulded feet for additional grab
- Highly UV and temperature resistant
- Available in yellow and black options

BLADE

- Made from 100% recyclable LLDPE raw material
- Rigid injection moulded connectors are made from TPU raw material, which allows for powerful rebound memory
- High UV and temperature resistant
- The reflective sheeting used on the delineator is a fluorescent yellow Class 3 HIP Prismatic sheeting
- Available with black on yellow, as well as a red on white reflective sheeting
- All Delineators are supplied with connecting plates and screws
- There are three different type of reflective sheet options
 - Single sided reflective sheeting
 - Double Sided Point to Point reflective sheeting
 - Double Sided Opposite Direction reflective sheeting

REBOUNDABLE DELINEATOR

The highly visible Delineator is safer because it is more likely to be there when you need it.
