

Your professional  
partner in steel  
tunnels and culverts.

## PROVIDING PROVEN SOLUTIONS TO THE MINING INDUSTRY

Armco Superlite manufactures a wide range of corrugated metal structures (CMS) products which are ideally suited to provide economical solutions in mining. With over 450 structures in its Construction Products portfolio which includes various profiles and sizes, ranging from as small as 300mm diameter to over 7m in diameter and superspan structures spanning over 12m, our structures extend across a multitude of applications ranging from haul road overpass/underpass, decline tunnels, and stockpile reclaim tunnels with escape tunnels. Other benefits are as follows:

- Ease of logistics as the structures are supplied Completely Knocked Down alleviating logistics burden.
- Ease of installation due to lightweight plate sections are connected together using bolts & nuts reducing the timeline.
- Long service life whereby structures can be designed for a lifespan of up to 200 years.
